INSTALLATION PLACED OUT OF SERVICE

The State of Illinois has adopted the American Society of Mechanical Engineers Standard (ASME) A17.1 as the Code by which Illinois will regulate conveyances. Should you desire to permanently remove a conveyance from service, the ASME A17.1, Section 8.11.1.4 procedures follow:

Periodic inspections and tests shall not be required when an installation is placed "out of service":

- (a) As defined by the authority having jurisdiction; or
- (b) when an installation whose power feed lines have been disconnected from the mainline disconnect switch; and
 - (1) an electric elevator, dumbwaiter, or material lift whose suspension ropes have been removed, whose car and counterweight rest at the bottom of the hoistway, and whose hoistway doors have been permanently barricaded or sealed in the closed position on the hoistway side;
 - (2) a hydraulic elevator, dumbwaiter, or material lift whose car rests at the bottom of the hoistway; when provided with suspension ropes and counterweight, the suspension ropes have been removed and the counterweight rests at the bottom of the hoistway; whose pressure piping has been disassembled and a section removed from the premises and whose hoistway doors are permanently barricaded or sealed in the closed position on the hoistway side; or
 - (3) an escalator or moving walk whose entrances have been permanently barricaded.

The identified conveyance has been permanently removed from service and ASME A17.1 procedures for permanent removal have been followed.
